PRO-MAX-AAP

DESCRIPTION

PRO-MAX-AAP is a cationic dry cleaning detergent incorporating state-of-the-art conditioning, cleaning and anti-static components. The product was designed for use in "injection system" dry cleaning applications. As an injection detergent, **PRO-MAX-AAP** requires no "charge" testing.

PRO-MAX-AAP was formulated for perchlorethylene, silicone and bromide type solvent systems.

APPLICATION

PRO-MAX-AAP contains a carefully balanced amount of moisture in a cationic environment, enabling it to provide highly effective cleaning results over a broad spectrum of stain types, producing exceptionally bright cleaning. This product provides excellent soil suspension.

Developed for injection type systems, **PRO-MAX-AAP** contains advanced de-odorizers which leave finished garments smelling fresh.

In addition, **PRO-MAX-AAP** contains special conditioning agents providing garments with maximum "hand" and drape.

USAGE

INJECTION: **PRO-MAX-AAP P** is injected at a rate of 1 ½ - 2 oz. per 10 lbs. of cleaning
STOCK: 1 part **PRO-MAX-AAP** can be mixed with 4 parts water for pre-spotting.

PACKAGING

PRO-MAX-AAP is packaged in 5 gallon pails and 15 gallon drums.
