## PARA SOUR R

### DESCRIPTION

**PARA SOUR R** is an effective neutralizing Sour product that has excellent rust removing capability.

Product has direct application where final pH of linen is required below the range found in the raw water used for rinsing, and where rust or iron matter is prevalent in same. Ammonium bi-fluoride in nature, **PARA SOUR R** is extremely soluble in all water temperatures.

### APPLICATION

**PARA SOUR R** is used in the range of 1-2 ounces per 100 pounds of wash, depending on the pH range and iron concentrations existent.

Care should be used so as to maintain a pH on linens in the range of 5.5 to 6.5 depending on the classification and finishing procedures.

### HANDLING

**PARA SOUR R** is an acid, commonly used for souring and rust removing applications.

Extreme care should be used in its handling. Product can cause skin and eye irritation upon contact, and if this occurs, area should be rinsed for 15 minutes with water or a solution of bicarbonate of soda.

### PACKAGING

**PARA SOUR R** is packaged in 100 pound lined fiber kegs.
